SMART LIGHTING CONTROL SOLUTION

- Flexible
- Secure
- Intelligent
- Scalable
- Wireless
- Low Power Consumption
- Integrated
- **Configurable**

LOGICA® is an automation solution that allows greater flexibility and comfort for any lighting control need.

It offers solutions that enable:

- Complete management of the lighting system.
- Energy consumption reduction.
- Real-time monitoring of consumption and savings.
- Integration with existing automation systems.

WIRELESS COMMUNICATION

LOGICA® uses Bluetooth Low Energy (BLE), making lighting control very simple to use. Allows reconfiguration of settings and remote scene creation and equipment programming for unified operation.

Its “standalone” sensors operate independently.

APPLICATIONS

Energy savings are achieved through lighting control by dimming and adjusting lighting based on occupancy or natural light levels. This makes it a perfect solution for both indoor and outdoor use.

SOFTWARE AND PROTOCOL

LOGICA® is compatible with CASAMBI, a software platform that manages data via BLE.

No wiring is needed to control lighting.

The BLE communication protocol allows wireless communication between sensors, switches, controllers, and all system components.

CASAMBI is a free software with a user-friendly interface, offering basic and advanced modes allows you to make configurations such as activation of sensors, on/off functions, dimming scenes, component linking, identification and recognition of components, among others.

■ KEY FEATURES

WIRELESS	<ul style="list-style-type: none"> • No wires required for controls • Strong RF signal works through doors and walls • Wireless range up to 50 ft • BACnet protocol compatible • Frequency specifically designed for this solution.
LOW CONSUMPTION	<ul style="list-style-type: none"> • Battery-free, maintenance-free • Easy to install • Energy harvester • Solar-powered wireless sensors • Kinetic power switches • Reduces energy consumption
INTEGRATED	<ul style="list-style-type: none"> • Detection and control in one solution • Drivers with integrated controls • Leading global protocols: 0-10V, DALI, PWM
CONFIGURABLE	<ul style="list-style-type: none"> • Easy setup • User-friendly software interface • Free CASAMBI software for iOS and Android
FLEXIBLE	<ul style="list-style-type: none"> • Allows changing switch/sensor locations without wiring • Create and reorganize lighting groups • Ideal for retrofit projects • Settings and configurations can be modified remotely.
SECURE	<ul style="list-style-type: none"> • Restricted to authorized users • 128-bit AES encryption
INTELLIGENT	<ul style="list-style-type: none"> • Automated and programmable lighting solution • Advanced features like adjustable controls and occupancy-based needs • Energy-saving options: occupancy sensors, time-based programming, and daylight harvesting • Mobile applications that allow you to monitor, configure and manage multiple locations in real time.
SCALABLE	<ul style="list-style-type: none"> • Build your own lighting control solution • Expandable from basic to advanced topologies • Add components as needed

RELAY

LOG-RLY-BLE CB

Circuit-based lighting control module

DESCRIPTION

LOG-RLY is a wireless line voltage controller that outputs 0-10V to the LED driver. It is designed to operate within a Bluetooth network system, enabling wireless dimming of LED lighting and seamless solution integration. It features wireless communication with other LOGICA® devices. Its physical size allows this unit to be placed inside the luminaire, or it also features a threaded bushing for mounting in a junction box when necessary.

- Color: White
- Configuration: CASAMBI

OPERATION

- Input voltage: 120-277 VAC 50/60 Hz.
- 0-10V dimming: 3mA, sink.
- Maximum Bluetooth range: 15-20 m (49-65 ft)
- Operating temperature: -40°C to 70°C
- Storage temperature: -40°C to 85°C

APPLICATIONS

Indoors: Private offices, classrooms, conference rooms, storage spaces, break rooms.

NODE

LOG-NODE BLE CB

0-10V LIGHTING CONTROL ON DEVICE FOR DIMMER AND OFF CONTROLLERS (2 CHANNELS)

DESCRIPTION

LOG-NODE BLE CB is a Bluetooth controller capable of controlling two channels, making it an ideal companion for tunable white applications. The two channels can also be configured to operate individually. It is powered by an external 12-24 VDC source. It is compatible with 0-10 V VAUX 12-24 V dimming LED drivers. It features wireless communication with other LOGICA® devices.

- Color: White
- Configuration: CASAMBI

OPERATION

- Voltage range: 12-24 VDC.
- Input voltage: maximum 24 VDC.
- Output voltage: 0-10 VDC, adjustable.
- Maximum output current per channel: 5 mA.
- Operating temperature: -25°C (13°F) to 45°C (113°F)

SENSOR

LOG-EMDCB

MOTION/LIGHT SENSOR

DESCRIPTION

LOG-EMDCB is a self-powered sensor for ceiling or wall mounting. It is self-powered through its solar cell and an internal energy storage, enabling this device to operate for up to four days in complete darkness. LOG-EMDCB reports motion detection and light measurements wirelessly, requiring no wiring. The mobile app allows you to adjust sensor parameters such as delay time, dimming level, sensitivity, daylight detection, and more. Lighting control is also available based on presence and ambient light level.

- Color: White
- Configuration: CASAMBI

OPERATION

- Input voltage: 120-277 VAC 50/60 Hz.
- Dimming 0-10V: 3mA
- Maximum Bluetooth range: 15-20 m (49-65 ft)
- Operating temperature: -40°C to 70°C
- Storage temperature: -40°C to 85°C

APPLICATIONS

Indoors: Private offices, classrooms, conference rooms, storage spaces, break rooms.

NODES W/SENSORS

LOG-HB/LB BLE CB

INTEGRATED 0-10V LIGHTING CONTROL FOR DIMMER AND OFF CONTROLLERS

DESCRIPTION

LOG-HB/LB BLE CB is a remotely configurable, fixture-mounted sensor. It communicates wirelessly with other LOGICA® devices and is compatible with 0-10V and VAUX 12-24V dimming LED drivers. LOG-HB/LB BLE CB is ideal for lighting control in installations up to 6 m (20 ft) high.

It features a mobile app that allows you to adjust sensor parameters such as delay time, dimming level, sensitivity, or daylight detection. Key applications include lighting control based on occupancy and ambient light level.

- Color: White
- Configuration: CASAMBI

OPERATION

- Product Type: PIR Occupancy Sensor
- Input Voltage/Consumption Current: 12-24VDC / 50 mA
- 0-10V Output: 100 mA
- Mounting height: up to 12.2 m (40 ft).
- Photocell sensitivity: On <30 lux, Off >100 lux.
- Operating temperature: -30°C to 70°C
- Maximum Bluetooth range: 49-65 ft (15-20 m).

NODES W/SENSORS

LOG-HBKO/LBKO

INTEGRATED 0-10V LIGHTING CONTROL FOR DIMMER AND OFF CONTROLLERS

DESCRIPTION

LOG-HBKO/LBKO is a remotely configurable, KNOCK-OUT-mount occupancy sensor. It is compatible with 0-10 V and VAUX 12-24 V dimming LED drivers. It also communicates wirelessly with other LOGICA® devices. This device is ideal for lighting control in installations up to 12.2 m (40 ft) high. It features a mobile app that allows you to adjust sensor parameters such as delay time, dimming level, sensitivity, daylight detection, and more. Key applications include lighting control based on occupancy and ambient light level.

- Color: White
- Configuration: CASAMBI

OPERATION

- Product Type: PIR Occupancy Sensor
- Input Voltage/Power Consumption: 12-24 VDC / 50 mA
- 0-10 V Output: 100 mA
- Mounting height: up to 12.2 m (40 ft).
- Photocell sensitivity: On <30 lx, Off >100 lx.
- Maximum Bluetooth range: 49-65 ft (15-20 m).
- Operating temperature: -30°C to 70°C

SWITCHERS

LOG-SWS/SWD BLE

SELF-POWERED WIRELESS CONTROLS

DESCRIPTION

LOG-SWS/SWD BLE is a single/double wireless dimmer switch. It provides convenient lighting control. It features self-powered rockers that require no batteries. Maximize your efficiency and implement LOGICA® sensors and controls. The switch can control lighting and achieve continuous dimming. It can communicate wirelessly with other LOGICA® devices. It is wireless; it requires no additional cables, making implementation quick and easy. It features decorator-style rocker pads capable of switching and dimming. Self-powered. No batteries to replace and no ongoing maintenance.

- Color: White
- Configuration: CASAMBI

OPERATION

- Product Type: Dimmable Wall Switch.
- Input Voltage/Power Consumption: Self-powered.
- Mounting: Surface-mounted or flush-mounted.
- Maximum Bluetooth Range: 9.14 m (30 ft).
- Operating temperature: -25°C to 50°C

APPLICATIONS

Indoors: Private offices, classrooms, conference rooms, storage spaces, break rooms.

2. NODES (NOD)

*Notes:

3. INTERNAL OCCUPANCY SENSOR (IOS)

*Notes:

4. INTERNAL OCCUPANCY SENSOR (OIS)

*Notes:

5. EXTERNAL OCCUPANCY SENSOR (EOS)

*Notes:

*Notes (P. 22 - 23)

- * Inline voltage wiring and dimming wiring.
- * Solution available only for LED, 0-10V dimmable products.
- * Place sensors only in strategic locations and not with all accessories.

- * Wireless range between 15-45 meters.
- * Low voltage control.
- * Requires a controller with auxiliary output.

ADVANCED SOLUTIONS allows the user to:

- Control the system using the mobile app.
- Control and monitor through the cloud or server.
- Download performance and consumption data.
- Perform basic solutions.
